Maibec CanExel engineered cladding, three board profiles, sixteen colours, one name you can trust.

PROFILES IN THIS GUIDE

Ridgewood D-5™

VStyle™

Ced'R-Vue™

Authentic *grain*

CED'R-VUE · SAND

Often imitated. *Still the benchmark.*

Maibec CanExel is the one and only engineered high-density fibre cladding – don't be fooled by imitations.

Every board undergoes rigorous resistance testing at both the paint and substrate levels. Subjected to extreme outdoor climates and UV — in conditions of freezing cold and intense heat — CanExel is engineered to perform in rain, snow, or shine.

BUILT TO LAST — THREE REASONS WHY

1 **FINISH**
Premium thermoset paint, multiple coats, cured at very high temperatures — unparalleled resistance to fading, cracking and peeling.

2 **WOOD GRAIN**
Non-repeating wood-grain patterns across every board. Authentic HDF substrate for the genuine look and feel of natural wood.

3 **SYSTEM**
Innovative tongue-and-groove system for fast, clean installation — Colour Matched Aluminium accessories to complete the look

Ridgewood *D-5.*

DUTCH LAP · COLOUR SHOWN: TUNDRA

Maibec CanExel Ridgewood D-5™ has the genuine look and warm appeal of Dutch lap siding. A deeply textured wood-grain profile that brings classic character to any build — shown here in Tundra.
